

III Conferencia Sudamericana de Ingenieros Geotécnicos Jóvenes

III Conferência Sul-Americana de Engenheiros Geotécnicos Jovens

III South-American Conference of Young Geotechnical Engineers

Cordoba, March 30th – April 1st – 2009

Invitation

Organization and General Information

Under the auspices of the International Society of Soil Mechanics and Geotechnical Engineering (ISSMGE) and the Argentinean Society of Geotechnical Engineering (SAIG), we cordially invite you to participate in the 3rd South-American Conference of Young Geotechnical Engineers to be held on 30 March – 1 April, 2009 in Cordoba, Argentina.

Purpose

The purpose of this conference is to bring together small groups of delegates from South American and North American geotechnical engineering societies, including PhD and MSc students and early-career academicians and geotechnical engineers.

The idea is to enable delegates to share experiences, research ideas, debate issues, and plan the future for the XXIth century geotechnical engineering profession in the Latin America.

Geotechnical Societies members of the ISSMGE are invited to send delegates to this conference.

Participation

Conditions and instructions to participate are the same as ISSMGE postulates for the International Young Geotechnical Engineers Conference. Every interested PhD or MSc student or professional engineer 35 year old or less (born after January 1st, 1973) can participate.

Papers, Lectures

All participants are expected to submit a manuscript and to deliver a short lecture about of his or her research projects or work experience.

In order to emphasize the wide field of geotechnical engineering and to make possible the wide – ranging participation for young geotechnical engineers with their personal themes, the conference is free from

subjects. The papers can deal with R+D, as well as with design and case studies in geotechnics and issues related to professional practice.

Spanish, Portuguese and English are the official languages of the conference. Manuscripts in either one of the three languages will be accepted. Every accepted manuscript must be presented in a technical session.

Activities

A tentative programme will be issued in the next communication. Technical sessions will be scheduled for the first two conference days and technical visits will be organized for the last day of the conference. Technical visits may include the Rio Grande pumped storage project located on the Rio Grande river near the Town of Santa Rosa de Calamucita in the Province of Cordoba in Argentina

Pre-Registration

A pre-registration is strongly encourage to gauge the level of interest in this activity. We appreciate your response by email to 3cligj@efn.uncor.edu by July 30, 2008th. Please state your complete name, affiliation, field of occupation, and country. The cost of registration will be determined based on the number of participants.
